

Pairing with a new NS1 Vehicle Interface

Step 1) With the vehicle off, bring up the Bluetooth Settings:

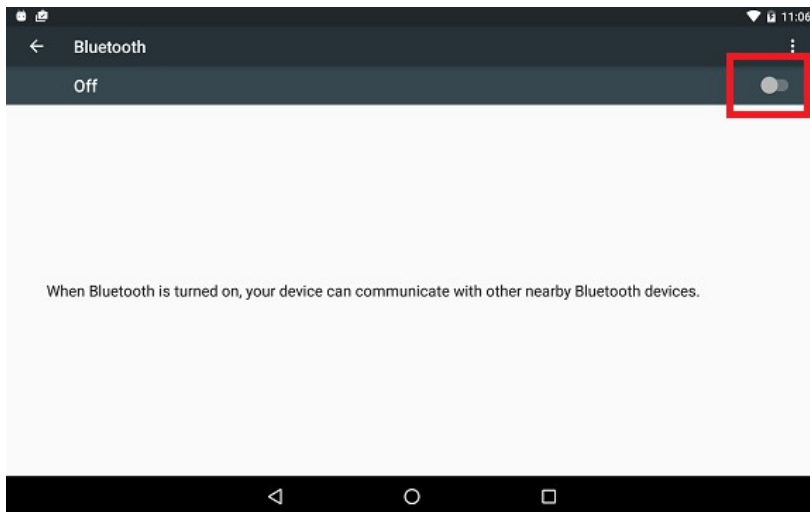

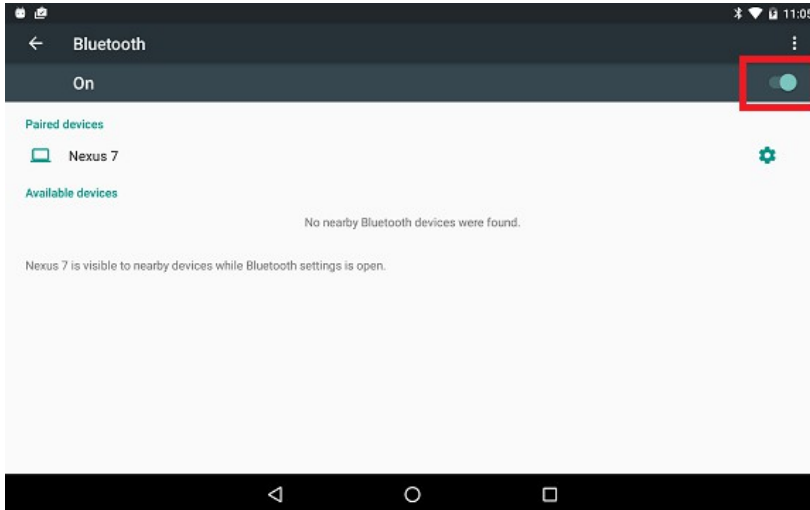

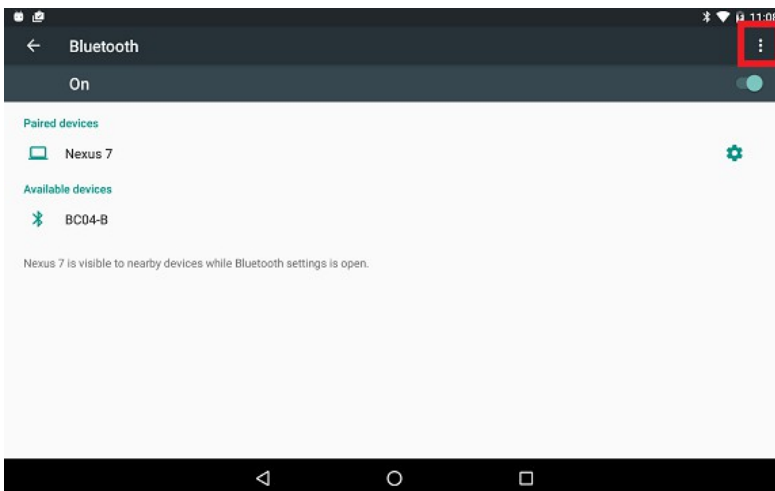

Step 2) Remove any existing NS1-XXXX devices:

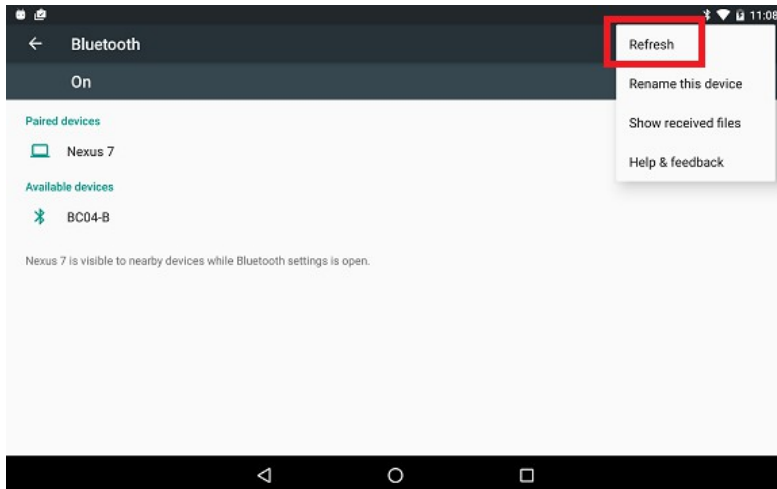

Step 3) Turn off and then turn back on Bluetooth

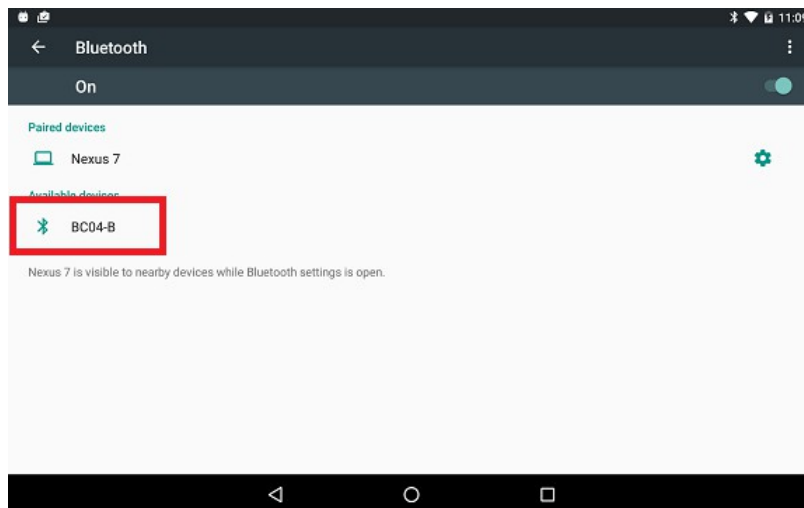

Step 4) Start the vehicle and refresh the list of available Bluetooth devices

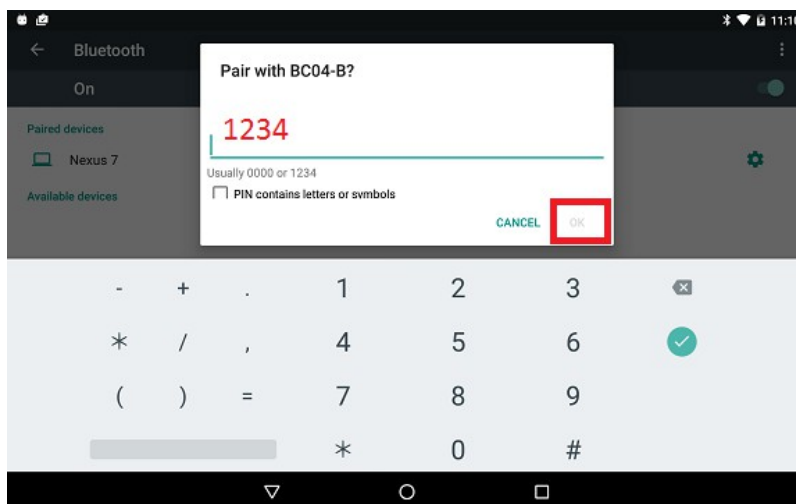

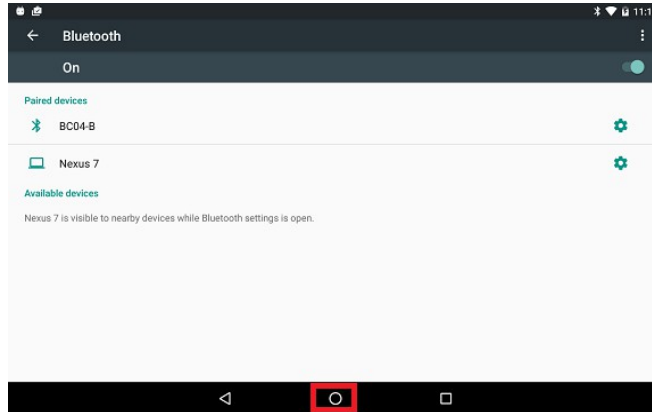

Step 5) Pair with the NS1-XXXX Device

Enter 1234 as the PIN

Step 6) Press the Home button and start the NS1 Dashboard App

Step 7) Change the Data Source to use new NS1 Serial Number

Once the NS1 Dashboard app has launched, press the menu button in the upper right corner (three vertical squares), and then select Change Data Source. Update the NS1-XXXX serial number and press OK. The NS1 Dashboard application may need to be closed and relaunched.
